

Dr. Thomas Quinn is Senior Investigator and Head of the Section on International HIV/AIDS Research in the Laboratory of Immunoregulation at the National Institute of Allergy and Infectious Diseases. He also serves as Associate Director for International Research for the Division of Intramural Research at NIAID. For the past three decades he has held joint appointments as Professor of Medicine and Pathology in the Johns Hopkins School of Medicine and in the Departments of International Health, Epidemiology, and Immunology and Molecular Microbiology in The Johns Hopkins School of Public Health, and Professor of Nursing in the Johns Hopkins School of Nursing. In 2006 he was appointed founding director of the Johns Hopkins Center for Global Health. Dr. Quinn has been involved in HIV clinical and epidemiologic investigations in 29 countries, with current projects in Uganda, Zimbabwe, Tanzania, India, China, and Thailand. His investigations have involved the study of the epidemiologic, virologic, immunologic features of HIV infection in Africa, the Caribbean, South America and Asia. His research interests have involved laboratory investigations that have helped define the biological factors involved in sexual and perinatal transmission, the natural history of HIV infections in developing countries, and the identification and characterization of unique strains of HIV-1 infection. He serves as advisor/consultant on HIV and STDs to the World Health Organization, Office of the Global AIDS Coordinator (PEPFAR), UNAIDS, and the FDA. He is a member of the Institute of Medicine of the National Academy of Science, and fellow of the American Association for the Advancement of Science. He is also a fellow of the IDSA and a member of the American Association of Physicians. He is an author of over 900 publications on HIV, STDs, and infectious diseases.
